Intelligent management of complex technology investments

Efficient Technology Management®

CHG

Thinking ahead: Easy budget planning.

"TESMA® allows me to allocate my commercial information to individual assets precisely. That gives me full transparency in my budget planning process."

Barrier-free: Broad interface portfolio.

"I simply ordered my assets through my existing ERP system. Integrating the order data into TESMA® is very straightforward, which allows me to do payment authorizations electronically and simplifies my processes."
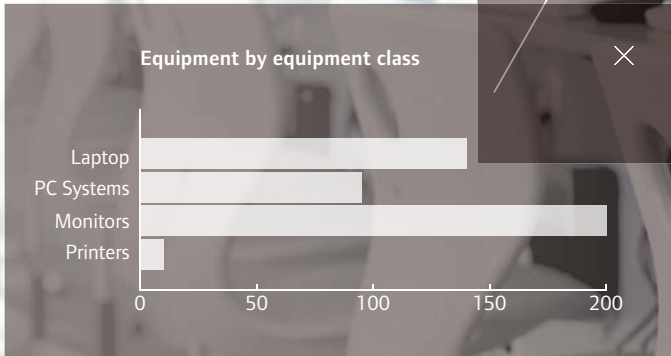

Perfect clarity: Precise cost accounting.

"TESMA® breaks my invoices down such that every asset is allocated to the right cost center, the right location, or the right organizational structure. I can assign individual positions and re-invoice costs with no extra effort."

What makes TESMA® unique?

The software links two worlds: the business world and the technological world. TESMA® collects information like equipment type, features, location, and consumption levels, as well as rental rates, cost centers, financing periods or consumables costs. This opens up new horizons in terms of transparency, budget management and intelligent controlling.

Creates value in many departments.

TESMA® gives you transparency to help you manage your technology landscape from both technical and commercial standpoints. Many departments at your company will benefit from this.

Controlling
- What kind of budget do I need to plan in for next year?
- Which expenses were posted to Cost Center 2021 this year?
- Create graphic reports in no time at all

Accounting
- Detailed information on each unit
- Invoices can be processed efficiently and allocated to specific cost centers

IT
- How do I link my technical database to my commercial data?
- What's been ordered, what's been installed, what's still in storage?

HR
- Seamless tracking of Employer Benefit Solutions (EBS) equipment
- Clear answers to EBS budget questions

Purchasing
- What sales turnover did I have when with which suppliers?
- Easy to integrate ERP systems and supplier shops

TESMA®: The most important updates at a glance

**Management dashboard
and intuitive user controls**

- Modern software interface
- Intuitive, uncomplicated user guidance
- Management dashboard with freely combinable widgets

**Additional
controlling reports**

- Location analysis with detailed device information
- Budget planning for sustainable IT financial management
- Invoice statistics
- Consumables reports

EDIFACT

- Electronically exchange invoice data for automated
  processing in your ERP systems

ERP Order Interface

- ERP orders are automatically transferred to the
  e-Procurement module

**TESMA® Download Scheduler**

- Periodically controlled unidirectional interface for
  TESMA® data

TESMA® web service

- Standardized, bidirectional interface for seamless linking
  to other databases, e.g. your CMDB
- Simplifies your processing with CHG-MERIDIAN

End of Life module

- Maps entire IT equipment rollback process
- Covers everything through "eraSURE" deletion process
- Transparent equipment tracking from pickup to
  erasure logs
